PROJECTS

Dog Town

JavaScript

<https://github.com/jsalexan/DogTown>
<https://min-andrew.github.io/Dog-park-finder/>

- An application to assist dog owners in locating dog parks.
- Allows a user to find dog parks within a 10 miles range in their selected city.
Roles included creating the CSS for the entire app, getting the Google Maps API set up, with the map display and custom pins, and logo/animation.
- Tools/Languages: HTML, CSS, Bulma, JavaScript, JQuery, Google Maps, Open Weather, and Canva.

Furever Friends

Full Stack

<https://github.com/jsalexan/Furever-Friends>
<https://fast-atoll-54795.herokuapp.com/>

- A social media application for you and your dog.
- Allows a user to login, create a profile for their dog, and post pictures and comments.
Roles included building the comment functionality, CSS for the profile form, and logo/animation.
- Tools/Languages: mySQL, NodeJS, Sequelize, Express, Heroku, Cloudinary, Multer, Nodemon, Insomnia, along with JavaScript, JSON, HTML, CSS, and Bootstrap.

Dog-tor's Notes

MERN

<https://github.com/jsalexan/Dogtor-Notes>
<https://whispering-plains-29779.herokuapp.com/>

- An application to assist in tracking your dog's health.
- Allows a user to keep notes for vet appointments, make to-do lists, chat with other dog lovers, and more.
Roles included creating the code for the vet notes, daily tasks, health tips, and over all styling.
- Tools/Languages: React, Apollo GraphQL, MongoDB, Mongoose, NodeJS, Express, JWT, Heroku, Cloudinary, Nodemon, along with JavaScript, JSON, HTML, CSS, and Semantic UI.
